# thermage® FLX

***THE LATEST INNOVATION  
from the #1 provider of skin  
tightening treatments worldwide***

# Treats several top aesthetic concerns

Versatile system can treat multiple areas:

- Face
  - Lines around the mouth, eyes, and forehead
  - Lack of definition of jawline and under the chin
- Body
  - Crepey skin
  - Wrinkled, lax skin on the abdomen and legs
- Eyes
  - Wrinkles and hooding

# Address the visible signs of aging in minutes

- Thermage® can help smooth, tighten and contour skin for an overall younger-looking appearance.

**No Surgery or  
Injections**

**A Single  
Treatment**

**Little to No  
Downtime**

**Fast and with  
Vibration to  
Aid in Comfort**

**Lasting Results\***

**Multiple  
Treatment  
Areas**

\*Recommended by physicians as part of an annual skin rejuvenation maintenance program

# How it works

- The Thermage<sup>®</sup> FLX system uses radiofrequency technology to heat the deeper, collagen-rich layers of the skin.
- The applied heat causes collagen to contract and encourages new collagen to start growing.
- This helps create smoother skin after just one treatment with results that continue to improve.

# What to Expect

## Treatment time:

- 30 to 90 minutes depending on the treatment area

## Sensation:

- You'll feel a brief heating sensation when the treatment's tip touches your skin, followed by a cooling sensation to help protect your skin and minimize any discomfort.

## Post-treatment:

- Little to no downtime
- Go right back to life as usual –no need to miss work or fun
- Results improve over time and can last for years.\*

\*Recommended by physicians as part of an annual skin rejuvenation maintenance program.

# A trusted skin tightening device

## AWARD WINNING

Best new technology –  
(2017 Thermoage® FLX  
system) The Aesthetic  
Guide

## INDICATION

The radiofrequency energy only delivery components of the Thermage<sup>®</sup> FLX system and accessories are indicated for use in:

- Dermatologic and general surgical procedures for electrocoagulation and hemostasis;
- Non-invasive treatment of periorbital wrinkles and rhytids including upper and lower eyelids; and
- Non-invasive treatment of wrinkles and rhytids.

The **simultaneous application of radiofrequency energy and skin vibration by the Thermage<sup>®</sup> FLX system** and accessories are indicated for use in:

- Dermatologic and general surgical procedures for electrocoagulation and hemostasis;
- Non-invasive treatment of periorbital wrinkles and rhytids;
- Non-invasive treatment of wrinkles and rhytids;
- Temporary improvement in the appearance of cellulite;
- Relief of minor muscle aches and pains;
- Relief of muscle spasms; and
- Temporary improvement of local circulation (blood circulation).

## IMPORTANT SAFETY INFORMATION

Do not undergo a Thermage<sup>®</sup> FLX treatment if you have a cardiac pacemaker or other active implants. Inform your doctor if you have this condition or are in doubt.

### The most common adverse effects include:

- Surface Irregularities: Frequently, surface irregularities are not evident immediately post-treatment, but may appear up to 1 or more months post-treatment.
- Altered Sensation: “Numbness,” “tingling,” or “temporary paralysis” that typically resolves in a short period of time, but may persist up to several weeks.
- Burns, Blisters, Scabbing, and Scarring: The procedure may produce heating in the upper layers of the skin, causing burns and subsequent blister and scab formation. There is a possibility of scar formation.
- Lumps / Nodules: lumps or nodules under the skin may occur primarily in the neck area that usually resolve within 1 or 2 weeks without chronic or long term complications.
- Pigment Changes: Hyperpigmentation (darkening of the skin) that normally resolves within several months.
- Edema: Swelling may occur and typically resolves within 5 days, but can persist up to several weeks.
- Mild to Moderate Pain: Typically, the discomfort is temporary during the procedure and localized within the treatment area.
